ANNUAL MESSAGE

OF THE

MAYOR OF CLEVELAND, HON. GEO. B. SENTER,

TO THE

CITY COUNCIL, MAY 1, 1865.

Gentlemen of the City Council of the City of Cleveland:

The municipal year now closes, and with its close cease the duties you honored me with, in May last, on the resignation of the then Mayor, Hon. I. U. Masters. These duties which may sometimes be disagreeable and difficult when entered upon in the midst of an Administration, have been rendered pleasant, and as easy as the nature of them admits of, by the good judgement which has characterized your proceedings, and by the willing assistance you and all others of the City Government have afforded me, and the mutual good feeling that has existed.

The past year has been one of continued prosperity. Alarms, it is true, have agitated our community, at times, of raids from over the border, but happily no foe has reached our shores, and business has pursued its customary routine, and our citizens have been unmolested in their wonted occupations. The war, waging furiously in the regions of armed disloyalty, has not afflicted us with its immediate terrors. A vigilant and strong National Government has assured us prosperity and unexampled success in all the pursuits and enterprises of peaceful life. Labor has been well remunerated; many commercial and manufacturing schemes have been projected and put in operation, population has rapidly increased, and though prices of living have reached

a height unprecedented in many years, yet suffering and want have not been proportionably augmented. No epidemic disease has visited us, no largely extended fires have ruined the merchant or mechanic, nor made houseless the poor; no riots have disgraced us, and no feverish excitements have preverted good judgment. The municipal expenses, in consequence of higher prices, of labor and material, and the calls for bounties and relief incidental to prolonged war, have been much increased, but not beyond the proportionate requirements of the increased population and the increased resources of our citizens.

It is a gratifying fact that the manufacturing interests and the carrying trade, particularly in coal, iron, and iron ore, are rapidly enlarging themselves. The immense trade in the articles enumerated has become a distinctive one, and in it our city and port have no successful rival. The pressure of the passenger business has compelled the erection of a larger Union Depot, and which, when finished, will be notable as one of the finest structures of the kind in the country. The many and large docks and freight depots are found to be insufficient, and new grounds for other and more extensive docks and depots are sought for. The permission given to railroad companies to extend their tracks across the river at some point near the entrance to the harbor will, to a great extent, afford means for present relief, and at the same time render valuable much land hitherto unavailable.

It is needless, I trust, to urge upon you the duty of seconding, by all proper legislation, every effort of manufacturers, railroad capitalists, and the commercial community, to increase and improve their capacities and conveniences for business, for benefits conferred on them inure directly and indirectly to our common welfare, in the increase of population and wealth, and consequent importance of the city.

All requests of the Government for recruits for the army, I am happy to say, have been complied with cheerfully by our citizens, and every available means used to aid in the speedy putting down of the rebellion.

The Public Schools, under the management of the Board of Education, are in a highly prosperous condition. Such has, however, been the growth of the city, that the many and com-

modious school houses prove inadequate to accommodate the number of scholars entitled to instruction. During the year additional room has been provided by the Board of Education for six hundred and seventy-eight scholars, and ten new schools have been established. This has been accomplished by renting rooms, and by economizing space. Scores of children are yet refused admission for want of room. This matter deserves your immediate attention. The expense attending building now being enormous, it becomes a matter of question whether substantial or permanent houses should be erected, or whether temporary quarters should be procured; but no doubt will be entertained, I believe, as to the necessity of immediately providing, in some way, ample means of instruction for all who are entitled to it.

The business of the Infirmary and outdoor relief has, I am well assured, been conducted judiciously—the wants of the poor having been properly relieved and economy for the city regarded. The report of the Infirmary Directors will fully acquaint you with the details of expenditures.

The duties of the Health Officer have been very satisfactorily performed, so satisfactorily indeed that nothing has occurred deserving special comment.

The expenses of the Police Department have been much increased over those of the previous year, and this is attributable chiefly to two causes, viz: the higher wages paid to policemen, and the greater number employed. The first became necessary from the increased expense of living. Frequent advices of projected raids and incendiary attempts from refugee rebels in Canada, were deemed by our citizens and your honorable body sufficiently authentic, and the danger sufficiently serious, to render the omission of any precautionary measure reprehensible, and consequently, by your direction, the Police force has been at times augmented, varying however, in number, as the danger seemed more or less imminent.

Aside from these efforts to guard against such unusual dangers, the labors of the Department have been as usual, and I believe the records will show that the activity and diligence of the Police have secured the prompt enforcement of the law and the maintenance of the peace.

The report of the Industrial School and Children's Aid Society shows continued activity on the part of the worthy Superintendent and his devoted assistants in carrying out the designs of the organization. During the past year, homes in good families in the country have been provided for fifty-two children, who otherwise would have been but homeless wanderers and subjected to every temptation to crime. Whatever may be done by you towards the support of this Institution will be so much done in aid of the prevention of crime, and for the relief of children poor and destitute by no act of their own.

The present system of a paid steam fire engine department continues satisfactory. The Fire Alarm Telegraph adopted and put into operation a few months since has proved all that could be desired, and the former uncertainties of alarms are almost entirely obviated. I have the pleasure of believing that both the Fire and Water Committee and Chief Engineer, as well as his subordinates, have promptly and judiciously performed their respective duties.

During the year 1864 the pipes for distributing water have been extended over two miles. The total length of water pipes is now twenty-nine and a half miles. A new main has been commenced, which, when completed, will prevent any chance of failure in the supply of water in consequence of any accident to the old one. Nine fire hydrants have been added, making a total of one hundred and sixty-seven (167.) There are, besides, thirty-two fire reservoirs supplied with water from the Water Works.

The number of water takers is fourteen hundred and forty-five (1445.) The receipts for water over running expenses and repairs were $17,862.75, being an increase of $5,283.94 over the previous year. The increase on the tariff of water rates has been 25 per cent., while the increase in expenses are stated as over 50 per cent. This increase in rates has been cheerfully acquiesced in, the propriety of it being obvious.

It will be seen from these statements that the Water Works are in a prosperous condition.

Many projected street improvements have been delayed or postponed, by reason of a scarcity of labor and the enormous expense of material; and yet 4,467 feet of streets have been graded and paved, and four times that length has been graded.

3,780 feet of grading have been contracted for and are nearly completed; 500 feet of grading and 3,539 feet of grading and paving have been contracted for and not commenced; 2,517 feet of sewers have been completed.

A draw-bridge, 270 feet long, with superstructure of iron, and sub-structure of stone, over the canal and river at Seneca street has been begun, and it is expected, will be completed before the first of July next. Its cost, it is estimated, will be about $51,000 towards which the county will pay about $18,000.

Two fire reservoirs have been built. Many improvements in streets and extension of sewerage are projected, but these it is unnecessary for me to specify.

The expenses of the city have been much increased in consequence of increase of prices in every department of labor and for every kind of material. Under no circumstances should the municipal government of a city, so wealthy as this be allowed to want for money to carry on all needful operations; neither should there be any further accumulation of debt. I submit the following brief statement of the condition of the finances:

Receipts from June 10th, 1864, to April 20th, 1865,	$586,649 36
Claims paid during the same time - - - - - - -	426,302 97
Bonded indebtedness - - - - - - - - - - - -	802,050 00
Temporary loans - - - - - - - - - - - - -	220,647 51
Value of bonds and other property owned by the city - - - - - - - - - - - - - - - - -	1,390,103 36

For further particnlars you are referred to the Annual Report of the City Auditor, which will be laid before you with the statements of the other departmets of the city government.

GEO. B. SENTER, *Mayor.*

INAUGURAL ADDRESS

OF THE

MAYOR ELECT OF THE CITY OF CLEVELAND,

HON. H. M. CHAPIN,

MAY 1, 1865.

Gentlemen of the City Council:

I assume the duties of Chief Executive Officer of this City with much diffidence. While fully appreciating the confidence of fellow citizens in placing me in this honorable, though arduous position, I feel overwhelmed with anxiety lest I may not be able to meet their expectations, and I shall rely upon you, gentlemen, for co-operation and counsel.

The position to which my fellow citizens have elevated me is one unsought, and I may say undesired by me, but I bring to its duties an honest desire to perform them impartially, and a resolution to give my whole time and energies to the welfare of our beautiful city.

Never having been a member of the City Government, it cannot be expected of me, neither would it be wise or proper for me, to review any department of the government of the city with reference to making recommendations to you, and it is more out of respect to the custom of my predecessors that I address you at this time than with any expectation of enlightening you, or foreshadowing any policy that I may have. I prefer to be first taught by experience, and shall then from time to time call your attention to such measures as may seem calculated to promote the public good.

My immediate predecessor has laid before you a full and able statement of the present condition of the various departments of the city government. Referring you to his financial report you

will observe that in all matters of expenditure during the coming year you will have to act with the most rigid economy consistent with the public welfare. In necessary expenditures pertaining to the permanent growth of our city, in education, refinement and wealth, an enlightened and patriotic constituency will go hand in hand with you, while at the same time they will hold you to a rigid accountability for any useless or extravagant expenditure in our current expenses.

I join with you in congratulations that the rebellion against our government, which has for four years been desolating a large part of our country, has been trodden under foot, and that peace will soon reign throughout our country. Far removed as we have been from the strife, we have scarcely felt its existence, except as we have been called upon for our fathers, brothers and sons to join the great army to beat back the enemy from our own borders. As individuals and as a part of this government, the questions at issue have been vital to us all, and we cannot have been unmindful of the result, and to that kind Providence who has carried the destinies of this country in His hand, and brought it safely out of its trial, purified of its great sin, should our gratitude be given.

Our brave soldiers a grateful people will ever have in remembrance. Those who have survived the shock of battle will soon return among us, and it is fitting they should be received in such a manner as shall show that we appreciate their services to the common country. It is little we can do for them compared with what they have done for us. Our gratitude, together with a living interest in their future welfare, is all we can give.

The honored dead, alas, we cannot receive, we cannot honor. Their ashes lie almost unmarked on every battle field. When *their* record is made up, a marble shaft should rise on our Public Park, perpetuating to all coming generations the names of those who went out to fight the battles of their country and never returned.

I invoke upon your labors the blessing of Divine Providence that He will guide you in your legislation to seek only that which shall be for the best interest of this people.

H. M. CHAPIN.

CITY AUDITOR'S FINANCIAL REPORT.

C. E. HILL, *Acting Auditor.*

Auditor's Office, May 1st, 1865.

CITY CIVIL ENGINEER'S REPORT.

To the Honorable the City Council of the City of Cleveland:

GENTLEMEN:—

I herewith present to your honorable body a statement of the labors and expenses of the City Civil Engineer's department, for the municipal year just closed.

In consequence of the high price of labor and all kinds of materials used in our public works, such as stone, brick and sewer pipe, a great many important improvements that were contracted for, or for which ordinances were passed, were upon petitions from property owners allowed to lay over from last year, to be completed during the coming season, yet notwithstanding high prices and scarcity of labor, a great number of petitions were presented to the Board of Improvements, for grading, paving and sewerage, nearly all of which received attention.

One of the most important works undertaken last year was the construction of a bridge across the canal and river at the foot of Seneca street. Plans and estimates were made more than a year ago for a bridge at that point, the superstructure to be of wood, but after a careful and deliberate consideration of the whole subject, the Board of the City Improvements, County Commissioners, and special Committee appointed by your Hon. body, decided to recommend the erection of an iron structure, with substantial stone work for a foundation, and permission was granted to contract for a bridge in accordance with said recommendation. The contract for the stone work and foundations was awarded to James McHenry, the sum amounting in the aggregate to about $25,000, the work was to have been completed by the first of January last, but owing to the unusual severity of the weather after the middle of November, nothing could be done at stone work. In the mean time the Atlantic and Great Western Railroad company built a temporary bridge on the site

of the old one, using such portions of the old timber as would answer the purpose and furnishing the balance at their own expense, the city to remove it when the new bridge is completed and return to said company the timber furnished by them. It has been a great convenience not only to the railroad company, but to the public generally, and has rendered any extraordinary effort to complete the work by the time specified in the contract unnecessary, and delays the time of payment just as long as the work remains unfinished after the time agreed upon. The superstructure will be in three separate sections, a draw or swing bridge, (King's Patent,) one hundred and sixty-two long, will span the river, and the space between the river and canal, and the the canal itself will be spanned by King and Freese wrought iron tubular arches, the whole when completed will be two hundred and seventy feet long, cost about $26,000. Zenas King, contractor. The iron work is as far advanced towards completion now as it can be, until the centre pier is completed, which will not probably be ready before some time in May, the bridge can then be put together in about six weeks, delaying the time of completing it until about the end of June.

Your attention has already been called to the necessity of erecting a bridge over the river at Central Way, the important business interests of the section of the city beyond the river at that point demands the erection of a permanent structure.

SEWERS.

Very little, comparatively, has been done in the way of building sewers. Plans and estimates and all the other necessary steps were taken for building a number of branch sewers, but in nearly every instance the property owners remonstrated against their construction on account of the high price of labor and materials, but there is a prospect of pushing the work this season with more than ordinary vigor, the amendment to the sewerage law introduced by our representative in the State Senate, has probably by this time passed both houses of the legislature under its provisions the city will be enabled to build main sewers that are greatly heeded in the eastern portions of the city, and for which the people have been petitioning for years past.

The following tables give the length of streets improved, the nature and cost of the improvement, &c. :

TABLE NO. 1.

Ordinances have been passed for the improvement of the following streets, viz :—

Detroit street from Kentucky street to the west line of the city. Dare street between Lorain and Detroit streets, Jay street between Pearl and Jersey streets, Alley between Champlain and Michigan streets, Alley between Ontario and Seneca streets.

An Ordinance has been passed for the construction of the following named sewers and branches : "St. Clair street Branch Sewer No. 1" to extend from Ontario street to Muirson street Main Sewer, with branches in Erie, Bond and Wood streets. Ordinances are before your Hon. body providing for the construction of branch sewers as follows : "Erie street Branch Sewer No. 1" to extend from Euclid street to Eagle street, with branches in Oak Alley, Prospect, Huron and Bolivar streets. Bolivar street branch sewer No. 4, to extend from the summit in Bolivar street to the Brownell street Main Sewer. Prospect street branch sewer No. 3, extending from the east line of the Sewerage District No. 3 to the Brownell street Main Survey, with branches in Huntington and Cheshire streets. All the above ordinances should be passed as soon as the notices expire.

MISCELLANEOUS.

Two reservoirs have been built, one at the intersection of Cedar and Hudson streets, and one at the intersection of Blair and Garden streets, at a cost of $295.00 for one and $300.00 for the other, total $595.00. A stone culvert has been built over Walworth Run at Burton street, at a cost of $239.46, and earth has been filled over the same, in the street adjacent, to the amount of $125.00. The approaches to Eagle street bridge have been raised and widened at a cost of $161.75.

The expenses of the department for the year have been as follows :—

Engineer's Salary, - - -	$1,500 00
Assistants' Salaries, - - -	1,823 29
Stationery, - - - -	47 34
Stakes, - - - - -	14 00
Total, - - - - -	$3,384 63

Before closing, permit me to call your attention to the system of collecting special taxes, or rather the entire absence of any

system. The practice heretofore has been to notify the owners of property fronting on a street improved, to call upon the City Treasurer by the time specified in the ordinance and pay the amount assessed against their property; the result has always been that not one in ten ever pays his tax until the end of the year, when he pays it with his general tax to the County Treasurer. Where contractors take the tax to collect themselves, they generally collect from seventy-five to ninety per cent. of the amount, proving beyond any question that if a collector of taxes was appointed, nearly all of our special taxes could be collected without having to be certified up to the County Treasurer. It is unreasonable to suppose that the City Treasurer can spend his time running after these taxes. The per centage allowed for collection can always be included in the assessment, so that no expense will be incurred for the City to pay.

Respectfully submitted,

JOHN WHITELAW,

Cleveland, April 11th, 1865. City Civil Engineer.

REPORT OF BOARD OF CITY IMPROVEMENTS

FOR THE YEAR ENDING MARCH 31, 1865.

To the Hon., the Mayor and City Council of the City of Cleveland:

GENTLEMEN:—The Board of City Improvements would respectfully submit in detail the following annual statement of expenditures in the Department of Streets, and other matters falling within the scope of their duties:

EXPENDITURES ON STREETS IN DETAIL.

SMALL POX HOSPITAL.

Whole number admitted into Hospital	42
Discharged cured 39; Died in Hospital 2	
Remaining under treatment 1	42

We had the Hospital enlarged by an addition of 30 x 20 feet, one and a half stories high, last summer, which renders the accommodation of patients much more ample and satisfactory than formerly. It is believed the room there now is quite sufficient to accommodate comfortably all who may have to be taken there for some years to come.

The Small Pox, which prevailed so extensively the past few years, I am happy to report has almost entirely disappeared from our City; there having been but one case admitted into the hospital during the last eight months, and I have known of no other cases during that time in the City. I have vaccinated during the year, on account of the City, three hundred and twenty three (323) persons.

There has been much more sickness among the poorer classes of people in the City during the last year than usual. Although there has not been any prevailing epidemic or particular form of disease among them, yet there has been much more proportional sickness, of all kinds, with them than among the wealthier and more comfortable classes.

This may be accounted for in part, perhaps, by the fact that fuel and all the necessaries of life have cost so much that many of the poor were unable to procure a sufficiency to render them comfortable and healthy.

I presume there never was a year in which the Director of Infirmary distributed coal and other out door relief so liberally as the one just closed. Notwithstanding this liberality there has been a great deal of destitution, and consequently sickness, among the poor of the City.

All of which is respectfully submitted.

I. H. MARSHALL,

City Physician and Acting Health Officer.

April 11th, 1865.

CITY SEXTON'S REPORT.

To the Hon. the City Council of the City of Cleveland:

I have the honor to submit the following report of the department under my charge for the year ending March 31st, 1865.

" Wells and Pump, (Woodland Cemetery, -	77 50
	$4,184 22
Net Proceeds, - - -	$7,359 78

The interments for the year in the several Cemeteries have been as follows:

Woodland Cemetery,	- -	357
Erie Street,	" - . . -	345
West Side	" - - -	382
Catholic	" - - -	574
Jewish	" - - -	29
		1,687

Adults, 645. Children, 1,042.

For the year ending, March 31, 1864, the total number of interments were 1,525, showing an increase during the past year of 162,

The receipts from Erie Street Cemetery were increased by the sale of thirty small new lots, which were obtained by narrowing the wide avenues in the free grounds.

I desire to urge upon the Council the necessity of rebuilding the fence upon the north and south sides of this Cemetery.

It will be difficult, if not impossible, to postpone this for any considerable time, with due regard to the proper protection of the grounds.

It is much desired that a full and constant supply of water should be furnished to Erie Street Cemetery, by the extension of the water pipes into it. The expense, compared with the resulting benefits, would be but nominal.

On the first of February last, Mr. H. G. Blake, who had long been in charge of the West Side Cemetery, as Deputy Sexton, resigned his position. Since that time, by the advice of the "Committee on Parks and Public Grounds," the Deputy Sexton in charge there has paid a stipulated sum, which is returned upon the monthly pay-rolls, and the entire income of that cemetry has been paid into the City Treasury. By the financial report it will be seen that from this source there was paid into the

Treasury, for interments, for two months from February 1st, the sum of $155.00.

All the desirable lots in this cemetery have been sold, and it will soon be necessary to devise means for supplying the increasing demand for lots in that portion of the city.

I would respectfully urge, that water pipes be extended to Woodland Cemetery, and that provision be made for beautifying it with suitable fountains and ponds.

Private taste is lavishing much for the improvement of particular lots. It is becoming, daily, a place of greater resort for citizens and strangers. So long as the condition of the Cemetery fund will warrant it, no expenditure will be more in accordance with the taste and judgment of the people, than that made by adorning a place in which all have so tender an interest. Especially should improvements be made in the new sections, as those who buy lots in them pay a larger price than those who buy in the old and improved sections, and are entitled to equal consideration.

All of which is respectfully submitted.

W. G. STEDMAN, *City Sexton.*

FIRE ENGINEER'S REPORT.

OFFICE CHIEF ENGINEER, FIRE DEPARTMENT,
Cleveland, April 1st, 1865.

To the Hon., the Mayor and City Council of Cleveland:

GENTLEMEN:—In compliance with the provisions of the ordinance regulating the duties of my office, I herewith present my first annual report of the receipts and expenditures of the Steam Fire Department, for the fiscal year ending, March 31st, 1865; also the Rolls of the several Companies with inventories of their effects; a copy of the record of fires and alarms, showing the amount of property damaged or destroyed, and the amount of insurance thereon; a statement of the number and location of the various fire hydrants and public cisterns in the City; and other statistical details of matter pertaining to this Department; to all of which your attention is respectfully invited.

During the past year another Steam Fire Engine Company, No. 5, has been organized and located on Phelps street, involving an expense of nearly $6,000.

With this addition, I am of the opinion that the number of Engines will prove sufficient for the protection of the City.

There has been added during the year, 1,050 feet of hose, making in all 4,850 feet. This, however, is not enough for all emergencies, and indeed such as will be very likely to occur in severe winter weather. I would therefore respectfully suggest the purchase of at least 3,000 feet more, in order to supply each company with a reserve line, and thus prevent another such misfortune as that which occurred on the first of January last.

There has also been added to the Department the *Fire Alarm Telegraph* at a cost of about $3,500, (which with improvements since made, at an expense of $400, donated by the Insurance Companies,) has been successful beyond our utmost expectations.

A great saving of property, fuel, and wear and tear of appa-

ratus has been accomplished. Indeed its advantages are so apparent that it is already regarded as an indispensable auxiliary of the Department.

There are now in the Department five steam Engine Companies, with Hose Reels attached to each. Each Company consists of ten men. Also, a Hook and Ladder Truck with two men. I would respectfully urge an addition of four men, to act as minute men, to be hired and used in the same manner as the pipemen of steamers.

I would also suggest the purchase of a new Truck and Ladders, as the present ones have been in use a number of years, and are nearly worn out. Ladders are indispensable, and the present ones should be replaced with new and longer ones. Those now in use are too short and weak for practical purposes. A good Hook and Ladder Truck, well manned and equipped, will be the means of saving a vast amount of property, and probably prevent the loss of life.

Considerable expense has been incurred during the last year by the remodelling and repair of the Engine Houses, to make them suitable for the accommodation of the steamers. Three new Reservoirs have been constructed, to wit: one on the corner of Washington and St. Paul Streets, (West Side,) one on the corner of Blair and Garden Streets, and one on the corner of Hudson and Cedar Streets. Twelve new Hydrants have been conconstructed, (see schedule.) That part of the City lying east of Hudson and south of Garden streeets, is in great need of a suitable supply of water for the extinguishment of fires, and the subject is commended to your serious consideration.

Three Volunteer Companies, numbers one, six and ten, have been disbanded. Their services were no longer needed by reason of the organization of Steam Engine Company No. 5.

On assuming the duties of Chief Engineer in February, 1864, no papers, records or memorandums were found to guide or aid me in their performance. I have been obliged, therefore, to organize and arrange the business of the Department entirely anew.

In the early part of the year I found a number of accounts unsettled and unpaid, which were negotiated in the year 1863 and 1864 by my predecessor. On being carefully examined and found to be correct, they were of course paid. These added to

the expenses of the current year in the Auditors' Report of the Expenses of the department, would, without explanation, produce the impression that the expenses of the last year have exceeded those of the previous one, which is not the fact.

I deem it my duty to call your attention to the existence of oil Refineries, and the storing of coal oil within the city limits, which, if tolerated, will in all probability result in the loss of life and in the destruction of a large amount of property. Some measures should be speedily taken, by which any quantity exceeding five barrels of Carbon oil or one Barrel of Benzine shall be prohibited from being stored at any one place within the City limits.

The Chief Engineer takes great pleasure in complimenting the officers and men belonging to the Department, for their promptness and fidelity in responding to the call of duty, and for their general good conduct. He would express his thanks to the Committee on "Fire and Water" and to all in authority for the hearty support and co-operation which has been extended to him in the discharge of his duties during the past year.

Respectfully submitted.

JAMES HILL,
Chief Engineer Fire Department.

2 Two wheel Hose carts.
1 Alarm bell on Engine House No. 10.
2 Reservoir wrenches.
1 Stove and pipe.
Several hundred feet of worthless rubber hose.

TELEGRAPHIC FIRE ALARM.

The Telegraphic Fire alarm will be used for signalizing all fires that occur within the City. Upon the discovery of a fire in any locality within the City, let the fact be made known to those having charge of the nearest signal box, and the alarm will be immediately telegraphed through the line.

RULES FOR OPERATING.

ARTICLE 1ST. The operator who receives notice of a fire will burst the paper across the hole and commence operations by making from five to ten rapid movements of the knob, as preliminary signals. He shall then strike the corresponding number with that on the face of the box.

ARTICLE 2ND. It shall be the duty of all persons authorized to make signals for fire alarms, to note whether the armature is against the magnet or lying upon the pin; if in the latter position, then the telegraph is not in working order. They shall then proceed to the nearest Engine House and give due notice.

ARTICLE 3RD. Those having charge of the signal box at Engine House No. 1, Frankfort street, will, every evening at nine o'clock strike the number of the hour. If the response is not made at the other stations throughout the City, it will be required of the several operators to report the same to the Fire company at the nearest Engine House, who will immediately proceed to examine the line in their district and cause the same to be put in order.

ARTICLE 4TH. Those having boxes in their charge are requested to notice who they receive alarms from, and that they are responsible persons, as they will be held accountable for all false alarms.

ARTICLE 5TH. All persons are strictly forbidden under the extreme penalty of the law, to meddle or in any way tamper with the boxes or line.

ARTICLE 6TH. Any employee of the Fire Department failing to comply with the above rules will be liable to dismissal from the Department.

ARTICLE 7TH. The operators are the members of the Fire Department, and those having charge of boxes, located in the following places:

EASTERN CIRCUIT.

Box No. 1. Columbus Depot.
" " 2. Myers' Stove Works, cor. River & Lighthouse sts.
" " 3. Engine House No. 1. Frankfort st. near Bank.
" " 4. Captain Kidd's res. 144 Lake st. near Bond.
" " 5. Boutall's store, Erie and St. Clair sts.
" " 6. Cor. Marshall and Hamilton sts.
" " 7. Cor. Alabama and St. Clair sts.

" " 11. Perry, near Prospect st.
" " 12. Engine House No. 3. Huntington near Garden st.

WESTERN CIRCUIT.

Box No. 1. Corner of Spruce & Center sts. Graham's Pail fact'y.
" " 2. " Pearl & Detroit, Truscott's store.
" " 3. Engine House No. 4. Church st.
" " 4. Corner Taylor and Detroit sts.
" " 5. " Lorain and Liberty.
" " 6. " Bridge and Penn.
" " 7. " Lorain and Brainard.
" " 8. " Columbus Machine Shop on the Flats.
" " 8. " Columbus & Center sts.
" " 9. Eng. House No 2. Champlain st. near Ontario.
" " 10. Chief Eng'r's residence, No 21 Oak Place.
" " 11. Corner Kinsman and Cross sts.
" " 12. " " " Irving sts.

SIGNALS USED BY MEMBERS OF THE DEPARTMENT ONLY.

35. Chief Engineer's signature.

23. Engineer's signature with number of Steamer to which he belongs, given after.

26. Calls for all companies repeated three times.

47. Try me on the other circuit.

49. Have tried on other circuit, can't get you, (line may be down.)

83. Alarm on other line, can't make it out.

643. Send your Hose Reel to fire.

573. Come to fire with Engine and Hose Reel.
258. Send your Captain to meeting this evening.
325. This is repeated from other circuit.
392. Send your Wagon.
12. I understand.
17. Do you understand.
37. Chief Eng'r wanted ; repeat No. of company twice.
14. I don't understand.
1, Repeated twice is call for Steam Engine Company No 1.
2, " " " " " " " 2.
3, " " " " " " " 3.
4, " " " " " " " 4.
5, " " " " " " " 5.

They will not repeat their number for signature. Eng. House No 1 will be the repeating station. When repeating alarms the operator will give a short alarm, then signal 325 with the number of the box from which the alarm came, at least three times, but will not again repeat the alarm nor sig. 325. Engine Co., No 3, will telegraph fire alarms from their House on Eastern circuit except when Eastern circuit is out of order, they will then send it on Western circuit, by giving short alarm, sig. 325, and the number of box.

Engine Company No 3, shall not repeat alarms from one line to another, except No 1 fails to repeat within 30 seconds from the time the number of the box is first given on the other line.— They will in all cases see that the alarm is repeated before leaving their respective Engine House.

When one Company is called they will answer 12, when more than one is called they will not answer but will give their attention.

CITY ATTORNEY'S REPORT.

To the Hon. Mayor and Council of the City of Cleveland.

At the close of my official term it becomes proper to make a report of the condition of affairs in my department.

By an amendment to the organic law, the City Attorney has charge of the business of the Police Court, as well as of the other legal business of the Corporation. The monthly reports of the Clerk of the Police Court exhibit a marked improvement in the amount of money received from fines. I do not think this the result of an increase of crime, but attribute it in a great degree to the efficiency of the Police aud others connected with the department, and to the fact, that what I regard a serious error has been corrected. For a long time it has been the practice of the City Marshal to discharge persons committed for the non-payment of fines when in his judgment it seemed proper. In this way the judgment of the Court was made ineffective by the action of an Executive officer. This course has not been pursued so far as I know during my term, and the result is obvious. The Police may make arrests, but has no power to pass judgment or to arrest judgment.

Judging from the result of the past two years, I am of the opinion that an able and efficient Police may do much towards sustaining itself.

Much has been done during my term in the way of appropriating property for Street and School purposes ; and in assessing damages sustained by grading Streets.

Land has been appropriated for opening Canal Street and for extending Superior street. Land located on Brownell street has also been appropriated for School purposes. I have heretofore reported the verdicts in these different cases to the Council, and am glad to say that the result has been entirely satisfactory.

The claims for damages for the proposed grade of Seneca, Michigan and Canal streets, have been heard and assessed by a jury.

In some of these cases, I consider the verdicts excessive. The fault, if fault there be, is in the law. It is very difficult to obtain a just verdict under the law governing such cases. The reason is that the evidence is necessarily speculative, and the damage about which the evidence is given prospective.

Where the grade touches improved property, witnesses differ widely upon the question of damages. One thinks the property damaged could be restored in one way, and one in another.

None know in what way the damages will be repaired, and but few agree upon the way in which it should be. Thus you have a variety of speculative opinions from experts and the jury is left to grope its way in the dark.

The law contemplates putting a man in as good a position as he was in before the improvement was made. Yet in many cases, parties make all the improvement they deem necessary and have a large surplus left, while others cannot make the needed improvements with the amount allowed. If the law allowed the estimate of damages to be made after the completion of the grade and improvements no difficulty would arise.

The case of Dalzrett *vs.* The City of Cleveland has been tried and resulted in a disagreement of the Jury. This action is brought by the Administratrix of the estate of Martin Dalzrett to recover damages resulting from the drowning of the said Dalzrett at the Light House street bridge. It was claimed that the drowning was the result of the carelessness of the deceased, and that the City was not in fault. The case is an important one, and should be tried by a Struck Jury.

In the case of William B. Martin against the City of Cleveland, judgment was rendered for the City.

The case of Lemuel Crawford against the City, was a writ of Error to the Police Court to test the validity of the Coal ordinance, and the Court sustained the ordinance.

The case of G. H. Lodge against the City, was a writ of Error to the Police Court to test the validity of the law relative to weights and measures. The opinion of the Court was against the Corporation and I did not think it best to proceed farther with the case.

The case of Samuel Starkweather against the City was a prayer for an injunction to restrain the City from the collection of a tax for improving Canal street. The tax was made upon property beyond the improvement and the injunction was properly granted.

But few cases against the City are now pending. One is entitled, The City of Cleveland against Martin Johnson, and involves the title of the City to certain real estate on the West Side.

Another is against the Brig Ocean, and is for damages claimed to have been done by reason of the improper management of the Brig. The case of Droullard against the City, grows out of the same state of facts.

The case of Lewis French against the City, was a claim for damages occasioned by the grade of that part of Seneca street lying between Champlain and Superior streets, and was settled for a small amount. The case of Henry Wick against the City, is now pending in the Supreme Court, and is intended to test the validity of the tax for opening Park street.

Other cases have occurred but as they have resulted favorably to the City, and are of no public importance, it is not necessary to mention them.

During my term no judgment has been rendered against the City in a litigated case, nor has occasion occurred for the employment of additional counsel. At the same time I am happy to state that I have during the whole term had the efficient aid of the Assistant Attorney, Mr. Brinsmade.

Very Respectfully,

JOHN C. GRANNIS,

City Attorney.

REPORT OF TRUSTEES OF WATER WORKS.

To the Hon. Mayor and Common Council
of Cleveland.

Gentlemen:—The undersigned Trustees of the City Water Works submit herewith the Annual Report of their Superintendent and Engineer, which exhibits the condition of the works, and also the operations in their Departments during the past year.

The Report of the Secretary shows the Receipts and Expenditures during the same period.

We have examined these Reports and find them full and explicit, and anything we may say in addition seems uncalled for; we therefore respectfully submit these Reports.

L. M. HUBBY,
PETER THATCHER,
Wm. B. CASTLE,
} Trustees.

Office of the Water Works,
Cleveland, Jan'y 30th, 1865.

To the Trustees of Water Works:—

Gentlemen: I herewith submit a statement, showing the receipts and expenditures of money on account of the Water Works for the year 1864.

The gross receipts for water are in excess of 1863, $9,977 61. The disbursements for running expenses are $3,561 30 more this year than last. The amount paid for repairs is in excess of last year $1,117 95. Water rent returns this year is $9 42 more than was returned in 1863. The total amount of excess of running expenses, repairs and returned water rent is $4,668 67.

The net receipts for water are in excess of 1863, $5,288 94.—Add to this amount the excess of running expenses, repairs and returned water rent $4,688 67, making $9,977,61, and deduct therefrom the amount of the 25 per cent., addition to the water rates from December, 1864, viz: $3,246 35, and we have the increase of water rent over 1863, viz: $6,731 26.

There has been paid for pipe extension $27,409 21, being $19,462 26 more than was expended in 1863.

Permits for 135 connections with the distributing pipes were granted in 1863, and in 1864, 121 connections were made.

The assets of the Water Works on the 1st Jan'y, 1864, amounted to $39,779 81, on the 1st Jan'y, 1865, the amount is $32,139 68, being a decrease of $7,640 13.

Water leases not renewed in December 1864, amount to $647,50. Add 25 per cent. making $809 37.

Respectfully,

GEO. W. GIRTY, Sec'y.

ANNUAL REPORT

OF THE

SUPERINTENDENT AND ENGINEER.

OFFICE OF WATER WORKS,
CLEVELAND, JANUARY 1ST, 1865.

To the Board of Trustees of Water Works:

GENTLEMEN:—The 9th Annual Report upon the operations of the City Waterworks during the past year and upon this present condition, is herewith respectfully submitted.

I. INLET TOWER AND AQUEDUCT.

These parts of the works are in good repair. Next Spring it will be required to examine them thoroughly again and to attend to such repairs as will be found necessary, in order to keep this important branch of the works in good working condition.

II. ENGINE HOUSE AND LOT.

The Engine House will only need the usual repairs and by taking the worn-out parts of the brick floors in boiler rooms up and putting new bricks in, will make these floors answer for a year or two more.

By that time the tracks of the A. & G. W. R. W. will be finished, and the necessary side-tracks for the delivery of Coal to our bins can be laid, new bins as recommended in last years' Report erected, and tracks for the hand-cars from the bins into the boiler-houses established; then is the proper time to lay good substantial stone floors in front of the boilers and to make a permanent job of the whole.

III. ENGINES AND BOILERS.

In conformity with the report of the engine man, in charge of the engines, they are both in good working condition.

They required last year the following repairs :—

1. Re-fitting of piston of East engine.
2. New valve check for air-pump of piston valve.
3. New rubber head valve for air pump.
4. Repairing of exhaust valve rod.
5. Re-fitting of steam valves on West engine.
6. New rubber-beat for lower pump valve.
7. Bracing of lower pump valve chambers.

The lower valve chamber of East engine pump split at the angle of the perpendicular side and the top. It was deemed best not to take it out, but strengthen the chamber by heavy braces. The arrangement accomplished all that was expected, the chamber is perfectly tight again, and no sign of further fracture has been discovered thus far.

At the same time the West engine was braced in a like manner, and it is thought they will be good and servicable for several years.

The boilers were thoroughly cleaned, examined, and the masonry around the fire-boxes renewed, and both batteries are now in good condition.

The lower wooden floors and tanks of the engines show already signs of decay, and the cataract floors had to be renewed already during the past year.

It is recommended to provide permanent metal structures in place of these wooden ones, as soon as it becomes necessary to renew them, whereby much trouble will be obviated.

The East Engine run last year - -	1269 hours	50 min.
" West " " " -	1578 "	20 min.
Total running time - - -	2848 "	10 "

The Engines were worked 313 days during the past year, the average running time per day being 9 hours 6 minutes; which is an increase over the year 1863, of 43 minutes per day.

Number of strokes of East Engine - - -	681,800
" " " West " - - -	801,425
Total number of strokes - - -	1,483,225

and as each stroke delivers to the Reservoir 321 gallons, the entire quantity pumped during the year was 476,114,225 gallons.

Average heighth above surface of Lake Erie,
to which the water was raised - - 157,313 feet

Average duty of East Engine - - 37,424,474
" " " West " - - - 35,588,054

pounds of water raised one foot high with every 100 lbs of coal consumed for raising steam and pumping.

IV. RESERVOIR.

With the exception of a portion of the inside brick pavement, this part of the work is in good condition, and a few thousands of bricks will make this pavement good again for another year.

V. DISTRIBUTION.

The whole pipe system is in good condition. The constant supply of water was never interrupted during the whole year.

The sole serious accident was the bursting of the chamber of the 24 inch gate in front of the Reservoir in the rising main.—As no other valve was on hand, it was taken out entirely and a piece of 24 inch pipe put in its place.

The 16 inch Main ordered to be laid, was commenced, and half of the entire length laid.

Through the difficulty of procuring pipe and labor, the extension of distributing pipes could not be executed as fast as desired, and has to be done during the coming season.

The extension of last year was 11,309 feet, or 2,142 miles; of which the appended Schedule A gives a detailed statement, and also a survey of the whole pipe system.

Schedule B exhibits the number and size of stop gates set during the year in connection with the pipe extension, with a table showing the whole number and the different sizes of all the stop gates in use.

Schedule C gives the additional fire hydrants and street cistern connections made in 1864.

Schedule D exhibits the pumping operations of the works during last year, and the consumption of water in the same period. Also, a tabular statement of the increase in the consumption of water from the year 1857 to 1864 inclusive; showing an increase in 1864 over 1863 of 13⅛ per cent.

New connections with the distributing mains have been made during the past year, as follows :

4 inch connections,	1
2 " "	1
1½ " "	1
1 " "	3
¾ " "	4
⅝ " "	111
Total,	121

The entire number of service pipe connections on the last day of December, 1864, was 1,445 ; which are classified as follows :

4 inch connections,	4
3 " "	3
2 " "	21
1½ " "	10
1 " "	54
¾ " "	123
⅝ " "	1,230
Making as above,	1,445

VI. GENERAL REMARKS.

The expenditures of last year have been, according to the certified vouchers :

I. RUNNING EXPENSES.

Pay rolls for 12 months	$8,403	36
Coal	4,037	07
Oil, tallow and soap	243	80
Cotton waste and packing	224	90
Hardware	24	14
Plumbing work	98	58
Small stores	12	50
Brass work	147	45
Iron work	55	08
Carpenter work	4	50
Advertising, printing and stationary	189	62
Rent of store-room	79	80
Gas fixtures and lamps	11	20
Ice for office	11	50
Painting, papering, &c., in office	111	09
	$13,654	59
Received for sundries	76	33
Net expenditure, Running expenses	$13,578	26

II. REPAIRS.

Payrolls for 12 months	$787 90
Repairs of Machinery and Tools	562 38
Lumber and Carpenter work	101 10
Hardware	253 85
Masonwork	30 12
Paving	3 63
Painting	210 60
Plumbing	5 50
Patterns	40 65
Castings for Engines	223 19
Firebricks and Clay	47 50
Small Stores	10 40
	$2,276 82
Received for Sundries	370 12
Net expenditure Repairs	$1,906 70

III. PIPE EXTENSION.

Payrolls for 12 months	$169 36
Castiron pipes and valveboxes	2,112 07
Iron and cement pipe	23,134 66
Stopgates	1,678 82
Lead	220 61
Plumbing and aircocks	10 50
Coal	6 87
Woodplugs and tanbark	12 75
Packing yarn	41 30
Hardware	33 08
Patterns	308 75
Tools and derrick	102 04
Advertising	20 50
	$27,851 31
Received for sundries	442 10
Net expenditure pipe extension	$27,409 21

IV. CONSTRUCTION FUND.

Received for sundries	$402 00
Paid for surveying	4 00
Receipts over expenditures	$398 00

The grading and improving of Kentucky street from Detroit street to Division street in front of Engine house lot is again submitted to your earnest consideration.

The increase of 25 per cent. on the tariff of water-rates, which has been ordered by you, was added to all water-bills in December last and no complaints about this measure come to our knowledge. It is hoped, however, that the prices of material and wages will not increase during the coming year to such an extent, that a further advance in the price of the water should become necessary.

The progress on the new map, which you authorized last Spring is very favorable and it will probably be completed during the coming season.

All of which is respectfully submitted.

JOSEPH SINGER,
Supt. & Eng'r.

SCHEDULE A.

I. Showing the Extension of Water Pipes in the year 1864.

Diameter of pipes in inches.	IN WHAT STREET.	BETWEEN WHAT STREETS	FEET LAID	TOTAL	REMARKS.
16	Franklin,	Columbus & Fr'nkl'n cir.	2,430		Iron & Cement

1863	420,790,875	1,152,851	13.83 "
1864	476,114,225	1,300,858	13.11 "

REPORT OF THE SINKING FUND COMMISSIONERS,

For the Fiscal Year ending January 3, 1865.

To the Honorable City Council
of the City of Cleveland:

In compliance with the provisions of the act entitled "An Act to authorize the City of Cleveland to fund certain Rail Road Stocks," passed March 26, 1862, the Board of Sinking Fund Commissioners present to the City Council the following abstract from their books, showing the receipts and expenditures for the year ending Jan. 3, 1865; and also the items which at the same date, constitutes the Sinking Fund.

1864. RECEIPTS.

Jan 7. Cash on hand as per last year's Account. -	410 66
Mar. 15, 6 mo, int. on $30,000, C. & M. R. R. Co'y Bonds at 7 per cent. less U. S. tax, -	1,018 50
April 1. Extra Dividend, 5 per cent. on $237,600 Stock in C. P. & A. R. R. Co. -	11,880 00
" 15, 6 mo. int. (due 1st May,) paid in advance in Gold on $30,000 U. S. 5-20 Bonds, at 6 per cent. - - - -	900 00
May 27. Premium on the above named Gold, -	738 00
June 1. 6 mo. int. on $25,000 Cin. & Ind. R. R. Co. Bonds at 7 per cent, less U. S. tax. -	848 75
July 1. 6 mo. int. on $25,000 C. P. & A. R. R. Co, Bonds, at 7 per cent. less U. S. tax,	848 75
" " 6 mo. interest on $1,000 C. & P. R. R. Co. Bonds, at 6 per cent. less U. S. tax, -	29 10
" " July Dididend on $237,600 Stock in C. P. & A. R. R. Co. at 5 per cent. - -	11,880 00
Aug. 23, 6 mo. interest, (due 1st Nov.) paid in advance in Gold on $30,000, U. S. 5-20 Bonds, at 6 per cent. - - -	900 00

Sept. 13, Premium on the above Gold, - -		1,124 30
17, 6 mo. int. on $30,000, C. & M. R. R. Co'y Bonds, at 7 per cent. less U. S. tax,		997 50
Nov. 10, Rec'd on acc't of claim against Clark & Williamson, from Samuel Williamson,		820 00
Dec. 1, 6 mo. int. on $25,000 Cin. & Ind. R. R. B'ds at 7 per cent. less U. S. tax, -		831 25
" 6 mo. int. on $30,000 Cleveland City Bonds, at 6 per cent. less U. S. tax, - -		900 00
1865.		
Jan. 1, 6 mo. int. on $13,500 paid Geo. B. Ely, Tr towards Jamestown and Franklin R. R. Co. Bonds, in advance of the date of said Bonds, which is July 1, 1864, Int. by agreement, 6 per cent. - -		405 00
" 3 mo. int. on $11,500 paid Geo. B. Ely, Tr as above stated, - - - -		172 50
" 1. 6 mo. int. on $25,000 C. P. & A. R. R. Co'y Bonds, at 7 per cent. less U. S. tax,		831 25
" 1 6 mo. int. on $1,000 C. & P. R. R. Co. Bonds, at 6 per cent. less U. S. tax, - -		28 50
" 1, 6 mo. int. on $50,000 J. & F. R. R. Co. Bonds, at 7 per cent. less U. S tax, - -		1,662 50
" 1, Jan. Dividend on $237,600 Stock in C. P. & A. R. R. Co. 5 per cent. less U. S. tax,		11,880 00
" 3, Bank Account overdrawn, - - -		336 50
		$49,443 06

EXPENDITURES.

1864.		
April 1, $11,500 Jamestown and Franklin R. R. Co. 1st Mortgage 7 per cent. Bonds at par		11,500 00

ANNUAL REPORT OF THE CITY INFIRMARY.

WORK HOUSE, HOUSE OF CORRECTION, PEST HOUSE AND OUT DOOR RELIEF, FOR THE YEAR ENDING MARCH 31, 1865.

INFIRMARY OFFICE, Cleveland, April 18, 1865.

To HIS HONOR THE MAYOR, AND THE HONORABLE CITY COUNCIL OF THE CITY OF CLEVELAND.

GENTLEMEN:

The undersigned would herewith respectfully submit their annual report of all the Departments falling within the scope of their duties.

INFIRMARY.

The number of inmates remaining March 31, 1864,	170	
" " " received during the year	251	
		421
" " " died 27, & discharged 252		279
" " " remaining March 31, 1865		142

EXPENDITURES.

First quarter ending June 30, 1864 -	$4,465	46	
Second " Sept. 30, 1864 - -	4,255	45	
Third " Dec. 31, 1864 -	5,010	12	
Fourth " Mar. 31, 1865 - -	4,552	36	
			18,283 39

INFIRMARY RECEIPTS

Produce of the Farm considered as receipts.

1200	Bush. Corn @ 80c - - -	$960	00
1180	" Potatoes @ $1 00 - - -	1,180	00
336	" Oats @ 78c - - - -	262	08
14	" Beans @ $2 00 - - - -	28	00
360	" Turnips @ 40c - - -	144	00
600	" Carrots @ 50c - - - -	300	00
25	" Beets @ 50c - - - -	12	50
40	" Parsnips, @ 50c - - - -	20	00
10	Tons of Hay, @ $25,00 - -	250	00
4000	Cabbages, @ 5c - - - -	200	00
3000	Pumpkins, @ 2c - - - -	60	00
2600	lbs. Pork, @ 14c - - - - -	364	00
40	Cords of Wood, @ $5,00 - -	200	00

Grapes, - - - - - - - - -	100 00	
Oat Straw, - - - - - - - -	40 00	
		$4,220 58

MISCELLANEOUS RECEIPTS.

County of Cuyahoga (boarding non-resident paupers.) -	$6,713 05	
Rockport Township, " "	78 00	
Newburgh " " "	182 42	
Brooklyn " " "	390 00	
Produce of Farm aside from, as above rep't'd	421 00	
Other receipts, boarding, &c., - -	875 43	
		$8,659 90
Total amount of receipts, - -		$12,880 48
Deducting receipts from expenditures, we have for actual Infirmary expenses, the sum of -		$5,402 91

During the year we have obtained good homes for about forty children, (inmates of the Infirmary.) The Protestant Orphan Asylum took under their charge, fourteen of the number, and twenty-five have been indentured and adopted by good responsible parties. In this disposition, not only a great good has been conferred upon the children, but a large expense for their maintenance has been saved to the City.

WORK HOUSE.

Within the past year a Work House has been established for the purpose of receiving prisoners sentenced from the Police Court. It is intimately connected with the House of Correction (a long established institution,) but a separate account has been kept, which is as follows:

No. of Commitments to the work house for the year -		124
For Vagrancy - - - - - - -	118	
" Being common Prostitutes - - - - -	3	
" Habitual Disturbance of the Peace - -	1	
" Intoxication - - - - - - -	1	
" Disturbance - - - - - - -	1	
		—124

EXPENDITURES.

For 3rd Quarter, ending Dec. 31, 1864, -	$243 58
" 4th " " Mar. 31, 1865, -	884 72
Total Expenses, - - -	$1,128 30

We would say that the Work House Law has thus far resulted very beneficially on account of the long term of sentence for which it provides. It has a tendency to drive away from us habitual offenders, and when sentences are almost entirely made under this act, we expect to see a still fewer number of Commitments.

HOUSE OF CORRECTION.

Commitments to House of Correction,		95
Intoxication,	69	
Residing in House of Ill Fame,	7	
Keeping do do	2	
Visiting do do	3	
Vagrancy,	14	—95

EXPENDITURES.

For Quarter ending June 30th, 1864,	$ 805 71
" " " Sept. 30th, 1864,	1,247 23
" " " Dec. 31st, 1864,	131 72
" " " March 31st, 1865,	200 91
Total expenses,	$2,385 57

PEST HOUSE.

EXPENDITURES.

For First Quarter, ending June 30th, 1864,	$690 96
" Second " " Sept. 30th, 1864,	463 12
" Third " " Dec. 31st, 1864,	395 02
" Fourth " " March 31st, 1865,	194,89
Total expenses,	$1,743 99

During the past year an addition has been made to the Pest House, and some repairs have been made to the main building, in all costing about One Thousand Dollars—a much needed improvement, and we think the money could not have been more judiciously expended.

OUT DOOR RELIEF.

Our receipts and expenditures for the relief of the needy out side of the Infirmary have been as follows:

Total amount appropriated by the Council from April 1st, 1864 to April 1st, 1865,	$1,500	00
Rec'd for boarding at Inf., & expended for		
O. D. R. of Rockport Township,	78	00
Do Newburgh "	182	42
Do Brooklyn "	390	00

Produce of Farm sold & moneys expended,	421 00	
Other receipts, boarding, &c., - - -	875 43	
		$3,446 85

EXPENDITURES.

For First Quarter, ending June 30, 1864,	$522 14	
" Second " " Sept. 30, 1864,	468 70	
" Third " " Dec. 31, 1864,	929 51	
" Fourth " " March 31, 1865,	1,029 91	
		2,950 26
Amount on hand April 1st, 1865,		496 59

BILLS FOR OUT DOOR RELIEF AUDITED FOR PAYMENT AND SENT TO THE CITY COUNCIL.

For First Quarter, ending June 30, 1864,	$226 05	
" Second " " Sept. 30, 1864,	153 00	
" Third " " Dec. 31, 1864,	1,396 02	
" Fourth " " March 31, 1865,	2,909 71	
		$4,684 78

It is with pleasure we report the erection of an additional wing to the Infirmary, which reflects great credit upon the City Council in their desire to relieve, or at least to render comfortable the condition of those suffering from insanity. A building of this kind has long been needed for the insane females, and we hope soon to see the financial condition of the city such as to warrant the erection of a similar wing at the South end of the Infirmary, for the use of the insane males.

The contract price of said addition was	$4,425 00
Superintendent's services,	133 00
Furnaces, Stoves, &c.,	351 13
	4,909 13

Making in round numbers a cost of about $5,000.

Through the exertions of the Infirmary Director an arrangement has been entered into with the County Commissioners to pay the expense of the transportation of non-resident paupers; this expense has hitherto been borne by the City. During the past year the County has paid into the City Treasury the sum of $321 90, which is the amount of said transportation. There has also been collected from the County the sum of $1,020 76, for non-resident paupers, for their board while sick with small-pox at the Pest House.

All of which is respectfully submitted.

A. E. BURLISON, Director of Infirmary.
G. S. WHEATON, Clerk.
